

Auto Dishwash Portfolio

PVA Hygiene provides an innovative and sustainable method of cleaning. As the UK's leading manufacturer of water-soluble cleaning products, we cover all areas of commercial cleaning. Over 24 years, we have developed a system using pre-dosed sachets that is straightforward to implement and balances environment diligence with commercial demands. Based in the South West of England, we distribute globally.

This portfolio contains documents relating to PVA Hygiene's AUTO DISHWASH.

This unique formulation is contained within a paper film that dissolves at the point of use. The sachets are dry, compact and light, they reduce storage space and transportation costs, and heavily reduce the environmental implications often associated with delivering cleaning supplies. The sachets are packed in planet friendly packaging, that can either be composted or recycled, helping you to eliminate single-use plastic from your current cleaning procedure.

PRODUCT DESCRIPTION

Auto Dishwash sachets use PVA Hygiene's unique VA4 technology. They are designed for commercial machine applications and are effective for cleaning crockery, cutlery, cooking utensils and glasses in machine dishwashers.

The detergent powder is formulated with powerful ingredients based on biodegradable surfactants and chelates that remove soiling and prevent the deposition of water scales. Additionally, a drying aid component ensures that the surfaces are left streak-free and shiny after cleaning.

The powerful cleaning and protective properties of Auto Dishwash Sachets help to provide a sustainable, safe, hygienic environment.

Sachets are supplied in the following Pack Sizes:-

Pack Size	Sachet Type	Order Code	Outer Packaging

- Supplied in a convenient water soluble sachet within a compostable container.
- Phosphate Free.
- EDTA Free.
- Chelates to prevent mineral scale spotting.
- Combined Detergent and Rinse Aid.

INSTRUCTIONS FOR USE

Remove any gross debris from crockery etc. Also check for damage and dispose of any items that are chipped or cracked. Carefully place items in the machine. Place one sachet into the machine and press the start control. At the end of the cycle allow items to drip/air dry. Note in areas of very hard water or for heavily burnt on soils two sachets may be required.
